Volume 19 Issue 6 | JAMIA November 2012

JAMIA is AMIA's premier peer-reviewed journal for biomedical and health informatics. Covering the full spectrum of activities in the field, JAMIA includes informatics articles in the areas of clinical care, clinical research, translational science, implementation science, imaging, education, consumer health, public health, and policy. JAMIA’s articles describe innovative informatics research and systems that help to advance biomedical science and to promote health. Case reports, perspectives and reviews also help readers stay connected with the most important informatics developments in implementation, policy and education.

Highlights

919 Careers in informatics: a diversity of options with an abundance of jobs
L Ohno-Machado

Editorial

920 American College of Medical Informatics Fellows, 2010 and 2011
D Masys, J J Williamson

Perspectives

931 AMIA Board white paper: definition of biomedical informatics and specification of core competencies for graduate education in the discipline

939 WHO guidance on electronic systems to manage data for tuberculosis care and control
H Timini, D Falzon, P Glaziccus, C Siemens, K Floyd

Review

942 Computerized clinical decision support for medication prescribing and utilization in pediatrics
J S Sultza, M C Nakata

Brief communication

954 The EpiCanvas infectious disease weather map: an interactive visual exploration of temporal and spatial correlations
P H Geseluck, Y Ionact, N Galli, M H Samore, A V Gundlapalli

960 Physicians who use social media and other internet-based communication technologies
C P Cooper, C A Gelly, S H Rim, N A Hawkins, J I Rodriguez, L Polonec

Research and applications

965 Patient characteristics associated with venous thromboembolic events: a cohort study using pooled electronic health record data
D C Kaellrea, W Foster, J Gibble, T E Love, A K Jain

973 The Diabetes Telemonitoring Study Extension: an exploratory randomized comparison of alternative interventions to maintain glycemic control after withdrawal of diabetes home telemotoring
R A Stone, M Aan Sevick, R H Bao, D S Macpherson, C Cheng, S Kim, I J Hough, F R DeRubeis

980 Standard practices for computerized clinical decision support in community hospitals: a national survey
J S Ash, J L McCormick, D F Singt, A Wright, C McMullen, D W Bates

988 Collaborative knowledge acquisition for the design of context-aware alert systems
E Joffe, O Huzeluk, J R Heskov, V L Patel, E V Bernsann

995 An improved model for predicting postoperative nausea and vomiting in ambulatory surgery patients using physician-modifiable risk factors
P Sarr, R D Urman, L Ohno-Machado

1003 Failure to utilize functions of an electronic prescribing system and the subsequent generation of ‘technically preventable’ computerized alerts
M T Bysar, M H Reckmann, L Li, R O Day, J J Westbrook

1011 Vaccine adverse event text mining system for extracting features from vaccine safety reports
T Botas, T Batshly, M D Nguyen, S Wintero, E J Woo, R Ball

More Contents ➤
Contents

1019 Method of electronic health record documentation and quality of primary care
J A Linder, J L Schnipper, B Middleton

1025 Clinical documentation: composition or synthesis?
L Mannykma, D K Vawdrey, P D Stetson, K Zheng, G Hripssak

1032 Predefined headings in a multiprofessional electronic health record system
A Terner, H Lindstedt, K Sonnander

1039 Data quality assessment in healthcare: a 365-day chart review of inpatients’ health records at a Nigerian tertiary hospital
I T Adeleke, A O Adekanye, K A Onasawola, A G Obuku, S A Adefemi, S A Erinle, A R A Shelu, O E Yehaya, A L A Adelusi, J A James, O O AbdulChanyey, L M Ogundiran, A D Jérol, M E Atabere, M Achiobere, O A Albidunrin, M W Hassan

1043 Mediation of adoption and use: a key strategy for mitigating unintended consequences of health IT implementation
L L Novak, S Anders, C S Gadd, N M Lorenzi

1050 Modeling nurses’ acceptance of bar coded medication administration technology at a pediatric hospital
R J Holden, R L Brown, M C Scanlon, B-T Karsh

1059 Retail pharmacy staff perceptions of design strengths and weaknesses of electronic prescribing
O Odusanya, M A Chai

1066 Drug—drug interaction through molecular structure similarity analysis
S Vilar, R Harpaz, E Uriarte, L Santana, R Rubadun, C Friedman

1075 Application of change point analysis to daily influenza-like illness emergency department visits
T A Kass-Hout, Z Xu, P McMurray, S Park, D L Backerdge, J S Brownstein, L Finelli, S L Groseclose

1082 Optimizing financial effects of HIE: a multi-party linear programming approach
S Sidhar, P F Brennan, S J Wright, S M Robinson

1089 Use of the internet and an online personal health record system by US veterans: comparison of Veterans Affairs mental health service users and other veterans nationally
J Tuo, R A Rosenheck

1095 Life sciences domain analysis model

1103 Transcriptional network predicts viral set point during acute HIV-1 infection

Case reports

1110 Applying knowledge-anchored hypothesis discovery methods to advance clinical and translational research: the OAMiner project
P R O Payne, R D Jackson, T M Best, T B Bondswsky, A M Lai, S James, M N Gurcan

1115 Challenges in creating an opt-in biobank with a registrar-based consent process and a commercial EHR
K Marsolo, J Corso, M G Barnes, C Pollick, J Chaffin, J Nix, C Smith, R Ganta

Correspondence

1119 When 'technically preventable’ alerts occur, the design—not the prescriber—has failed
A L Ross, M Weiner, J J Saleem, R L Wears

1119 Consistency or efficiency? A dilemma for designers
M T Baysari, R O Day, J I Westbrook

1120 In response to: Method of electronic health record documentation and quality of primary care
J A Handler, J G Adams

Messages from AMIA

1122 President’s column: Informatics professionals—leading the way?
K M Fickenscher
